**Sustainability at Balmoral**

At Balmoral Lodge Motel, we're committed to reducing our environmental impact and supporting the Southland community. We focus on practical steps in our day-to-day operations and welcome our guests' help along the way.

**Caring for our environment**

Our current practices include:

- Providing on-site EV charging for guests with electric vehicles.
- Recycling cardboard, paper, cans and accepted plastics, with recycling bins available for guests.
- Recycling used printer cartridges.
- Purchasing products from local suppliers to support local businesses and employment.
- Offering a towel reuse programme to help conserve water and reduce unnecessary washing.

Small actions during your stay can support these efforts. Please use the recycling bins provided, switch off lights and televisions when you leave your room, and consider reusing your towels where practical.

Our team is happy to explain what can be recycled and how our towel reuse programme works.

**Supporting our community**

Balmoral Lodge Motel is part of ILT, a community owned organisation that has returned more than $230 million to the local community, including support for environmental and conservation initiatives across Murihiku/Southland. Your stay helps support local projects that care for our region's environment and people, from recycling and inclusive employment to native bird conservation.

We regularly review our operations and look for practical ways to reduce waste, conserve resources and improve our environmental practices.
